Central Valley Electric Cooperative, Inc.

Home Energy Audits on Hold

If you haven't had a Home Energy Audit yet, you can still sign-up to have this free service at your house. Just note it will be April 1 when Green Medal Energy starts scheduling audits again in our area. Give us a call if you would like to be put on the list to be scheduled in April.

Green Medal Energy is the company we contract with to perform the free home energy audits. Their team of experienced, licensed professionals will perform various tests on your home to help determine where you are losing energy and money. They will then make minor repairs to help correct problem areas identified in the audit.

If you have questions or would like to be put on the list, please give us a call at 575-746-3571.

CVE Annual Meeting - Save the Date

Mark your calendar for CVE's Annual Meeting Saturday, March 19.
More information coming soon.

Community Room Available

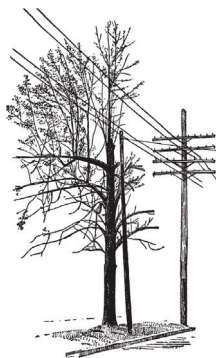

If you're looking for a place to host your next meeting, training, or civic activity, the Central Valley Electric Cooperative Jack Case Community Room is available.

This 2,400 square foot room can accommodate over 300 chairs, or 170 tables and chairs. There are no fees to use the room, but some restrictions apply. Give Leah or Raelynn a call for more information and to check availability.

Tree Trimming

CVE recognizes the valuable asset trees can be in our landscape. However, when trees or other vegetation grow in close proximity to electric lines, they can cause power outages and blinking lights, fires, and are dangerous to anyone who may come in contact with a tree limb that is touching a conductor.

If you feel a tree has become a potential hazard inside or outside the co-op's right-of-way, please give us a call at 575-746-3571. Do not try and trim trees near power lines.

ATTENTION HOME SCHOOL PARENTS

Central Valley Electric Cooperative co-sponsors a Safety Coloring Contest every year for students in the second, third and fourth grades. We deliver coloring posters to schools in Artesia, Dexter, Hagerman and Lake Arthur.

We would like to include home school students in this contest. If you are a parent or know a parent who is home schooling their children and they would like to participate, please have them give us a call at 575-746-3571.

CVE also offers a free electrical safety demonstration to teach children to be safe around electricity. Give us a call if there is a group of home schooled children that would like to see this demonstration.

Before You Say Yes to Solar

There is a lot to consider before you say yes to solar, and at Central Valley Electric Cooperative we want members to be fully informed.

Please give us a call, before you sign any contracts with a solar company or start installing solar panels. There are New Mexico rules and regulations the co-op must follow before you get started. We are here for you, and we want you to have all of the information you need to make an informed decision.

If you have any questions or want to start a renewable energy project, please give us a call at 575-746-3571.

Welcome New Employees
